

ProFit® for the Lady

Every woman has one secret

“ProFit® for the Lady” is a small, discreet device that enables women to palpate, activate and strengthen pelvic floor muscles by means of a training programme.

Active protection and training in one product

The STIMPON® uses its elastic properties to support and activate the pelvic floor muscles, thus making it possible to close the urinary tract.

Pelvic floor training with biofeedback at all times

Pelvic floor training with “ProFit® for the Lady” can be performed at all times, in all places and totally unnoticed by the people around you!

Unlike former times with conventional biofeedback systems, when users had to conceal themselves in an unobserved spot for every application, every woman can now train when, where, as often and for as long as she likes. Whether at home or on the move, alone or in company, during sport, walks, on holiday or relaxing in the garden: every woman can train when, where and for as long as she likes.

“ProFit® for the Lady” is so small that it can be concealed effortlessly under clothing during training. And when it is not required, it will fit into every handbag.

Biofeedback with vibrotactile response

During training the system communicates with the user by noiseless vibration. “ProFit® for the Lady” is discreet. Nobody around will notice the training going on.

Regular, correct training enables strengthening of the pelvic floor muscles. It is indispensable for maintaining continence.

Strong pelvic floor muscles enhance sexual sensitivity and adds fun to love-lives.

“ProFit® for the Lady” – improves the quality of pelvic floor training

“ProFit® for the Lady” is European patent pending.

The STIMPON® Sensor is already covered by a European patent: EP 0 963 217 B1.

TECHNICAL DATA

Weight:	30 g including battery
Dimensions:	69 x 35 x 11 mm (H x W x D)
Rechargeable battery:	NiMh 1,2 V
Internal power supply	
Protection type:	BF 
Protection class:	Class I 
REF:	1770

Scope of delivery

- ProFit® for the Lady system
- STIMPON® electrode
- STIMPON®
- Operating instructions
